ELECTRICAL ENGINEERING IN JAPAN

VOLUME 107

CONTENTS FOR 1987

Number 1

Page

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

TSC and Space-Charge Measurement in Low-Density Polyethylene Under Needle-Plane Electrodes, by Masahiro Fukuzawa, Mitsumasa Iwamoto, and Taro Hino 1
Measurement of Accumulated Charges Inside Dielectric by Pulsed Electric Force Techniques, by Hidefumi Kushibe, Takashi Maeno, and Tatsuo Takada 11
A Study of Thermal Effects on Arc Duration in Pd and Pt Contacts, by Hiroyuki Ishida, Hideaki Sone, Hiroshi Echigo, and Tasuku Takagi 18
Poloidal Current Driven by an RF Rotating Magnetic Field, by Eiki Hotta, Mitsuaki Suzuki, Kazuyoshi Kunitomi, and Izumi Hayashi 30
Residual Voltage of γ-Irradiated Low-Density Polyethylene, by Sanshirou Yamanaka, Tadashi Fukada, Goro Sawa, and Masayuki Ieda 41
Accuracy of Magnetic Field Strength Measurement by Single Sheet Testers, by Takayoshi Nakata, Yoshihiro Kawase, and Masanori Nakano 50

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

A Study on the Fabrication and the Performance of the Solid Electrolyte Fuel Cell, by Yoshihiro Ohno, Yasuo Kaga, and Susumu Nagata 59
Sensitivity Analysis of Ocean-Based Closed Cycle OTEC Power System, by Takazawa Hiroyuki, Murata Akinobu, and Kajikawa Takenobu 68
Characteristics of DC Series Motor Driven by Field Chopper Controlled Two Power Supplies, by Shigeyuki Suzuki, Takuya Kamano, Ikuo Ozaki, and Hironobu Harada . . 79
LQI-Type Load Frequency Control with Control Delay of One Sampling Time Under Generation Constraints, by Katsumi Yamashita and Hayao Miyagi 87
Completely Contactless Linear DC Motor Using Magnetic Suspension, by Fumio Matsumura, Shinji Maeda, Masayuki Fujita, and Hideki Fukuzono 95
Explicit Representation of Machine Constants and Structural Parameters of Superconducting Generators, by Toshio Shintani, Tanzo Nitta, and Takao Okada 104
Power Loss Reduction of Snubber Circuits for Gate Turn Off Thyristors, by Hirotami Nakano, Hideo Tsuchiya, Tsuyoshi Matsuo, and Koji Iwata 114
Parallel Running of GTO PWM Inverters and Its Power Control, by Katsuaki Suzuki, Shigero Ohkuma, and Koji Iwata 123

Page

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits, Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

Heat Transfer Behaviors along p^+n^+ Junction Surface of Semiconductor Devices, by Hideo Kogure and Yoshitaka Ikeda 131

Number 2

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Measurement of the Position of Zero-Filled Plane of Space-Charge Field in Insulators by Temperature Gradient Thermally Stimulated Surface Potential, by Keizo Kato, Mitsumasa Iwamoto, and Tara Hino 1
Determination of the Polarity of Carrier Traps in γ-Irradiated Polyethylene by Temperature Gradient Thermally Stimulated Current, by Keizo Kato, Mitsumasa Iwamoto, and Taro Hino 12
Spherical Shock Waves Produced by the Partial Explosions of a Copper Wire in Air, by Ken Yukimura 22
Discharge Cleaning Efficiency and Behavior of Impurity Gases, Hiroaki Kojima, Hideo Sugai, and Takayoshi Okuda 31
Analysis of Magnetic Field of Single-Sheet Tester Taking into Account Hysteresis Characteristics, by Shunji Harada, Yoshiyuki Ishihara, and Toshiyuki Todaka . . 44
A Hybrid Discretization by Conforming and Nonconforming Elements for Boundary Element Method, by Takashi Onuki, Keiichi Sato, and Tsugio Yamamura 53

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Experimental and Analytical Study on 1/3-Subharmonic Oscillation in Three-Phase Circuits, by Koshi Okumura, Shigekazu Nakamura, and Akira Kijima 63
A Fast Method for Contingency Analysis Based on P-Q Decoupled Model, by Dong Jiang Li, Eiichi Tanaka, and Jun Hasegawa 71
Analysis of Surge Characteristics of Tower-Ground Wire-Phase Conductor System by Electromagnetic Field Theory, by Kohshi Okumura, Shigeru Tani, and Akira Kijima 81
Universal Power Distortion Compensator Using Secondary Excitation of a Rotating Machine, by Isao Takahashi and Minoru Nishitoba 89

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits, Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

Development of a Linear Model for Corona Wave Deformation and its Effects on Lightning Surges 98
10-kW MOSFET Power Amplifier Operating at Medium-Wave Frequencies, by Hiroaki Ikeda and Kazuhisa Hayeiwa 107
Task Scheduling Algorithms for Multiprocessor Real-Time Control Systems, by Munenori Kai, Hironori Kasahara, Seinosuke Narita, and Hitoshi Ukaji 120
Efficient Learning Control of Markov Chains with Many States and Decisions, by Mitsuo Sato, Kenichi Abe, and Hiroshi Takeda 131

Number 3

Page

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Calculation of Electric Field and Charge Density for Bipolar HVDC Transmission Line, by Nobuhiro Fujioka, Tadahiro Shiota, Emilio Fujiwara, and Yoshihiro Tsunoda 1
Characterization of Versatile Temperature-Sensitive Magnetic Semiconductor with Nonlinear Negative Resistance, by Kyoshiro Seki, Jun-ichi Shida, and Koichi Murakami . 14

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Development of a Simulation Method for Operation of Current Limiting Fuse and Confirmation of Its Effectiveness, by Masayuki Okazaki and Tsuginori Inaba 21
Analysis of Frequency Entrainment in Three-Phase Circuits, by Koshi Okumura, Sachio Fukuda, and Akira Kishima 30
Numerical Analysis of Surge Currents Induced by Return Stroke Current and Tower Current Utilizing Electromagnetic Field Theory, by Kohshi Okumura, Shigeru Tani, and Akira Kijima 38
Three-Dimensional Temperature Simulation of a Generator/Motor Armature Under Periodic Boundary Conditions, by Mitsuru Fukushima and Masato Teraoka 46
Eigenvalue Sensitivity with Respect to Operating Point for Eigenvalue Control of Power System, by Akihiko Yokoyama, Takafumi Mayeda, and Yasuji Sekine 56
Analysis of Subharmonic Oscillation by Equivalent Transfer Function, by Kohshi Okumura, Masayuki Tanaka, and Akira Kijima 67

PART D

Industrial Applications

Location of Short Circuit in a Transformer by Detecting the Flux Distribution Change, by Takayoshi Nakata, Yoshihiro Kawase, and Kazutaka Misawa 75
Electric Power Transmission Characteristics of High-Frequency Inverter with a Load Connected Through a Distributed Constant Line, by Toshihisa Shimizu and Mitsuo Shioya 86
Waveform Control of PWM Cycloconverters with Sinusoidal Input Current, Sinusoidal Output Voltage and Variable Input Displacement Factor, by Muneaki Ishida, Masami Iwasaki, Shigeru Ohkuma, and Kouji Iwata 95
Analysis of a Permanent Magnet-Type Linear Pulse Motor for Automatic Transfer Machine Systems, by Daiki Ebihara and Tsukasa Yoshiura 104
Common Equivalent Circuit fo Three Types of DC Choppers, by Hisaichi Irie 113
Frequency Doubler-Type SIT High Frequency Inverter and Analysis of Its Transient and Steady-State Characteristics, by Yoshihiro Hatanaka, Matsuo Nakaoka, and Toru Maruhashi 122
A Method for Determining the Operational Impedance of Synchronous Machine, by Yasuhiro Komatsu and Takeo Okada 131

Number 4

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Measurements of Spatial Distributions of Potential and Charge Density in DC Bipolar Ion-Flow Fields with a Wire Probe, by Nobuhiro Fujioka, Kenji Arai, Shin-ichi Furuya, Motoi Terano, Satoru Kuwabara, and Yoshihiro Tsunoda 1

Page

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Concept of Eigenvalue Control by Optimal Setting of Operating Point for Power System Stabilization and Its Algorithms, by Takafumi Maeda, Akihiko Yokoyama, and Yasuji Sekine 12
Effect of Neighboring Unstable Equilibrium Points on the Midterm Stability of Power System, by Tsutomu Oyama and Yasuo Serizawa 22
Effect of Load Characteristics on Dynamic Stability of Power System, by Shintaro Komami, Shigeo Kimura, Toshihiko Komukai, and Kaoru Koyanagi 32
A Study on a Decentralized Load Frequency Control Using Frequencies of Adjacent Areas, by Hiroshi Sasaki, Takuya Suizu, and Shinji Yurino 42
Fast Transient Stability Solution Using Algebraic Processing Language "REDUCE", by Hiromi Suzuki and Shinichi Iwamoto 51
On-Line Contingency Selection Algorithm for Voltage and Overload Security Analysis, by Koichi Nara, Susumu Yamashiro, and Jun Hasegawa 60
A Method of Estimating the Grounding Resistance of Power Transmission Tower Foundation, by Masanobu Noda, Hitoshi Kinoshita, and Ichiro Matsubara 68

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits, Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

Autonomous Controllability of Systems Attaining High Reliability, by Minoru Koizumi and Kinji Mori 77
Stability and Practical Stable Operating Region of Induction Generator, by Tsuneo Uchijima, Katsuharu Fukushima, and Takashige Saijo 87

PART D

Industrial Applications

Vector Control System for Induction Motor Using a Speed Estimation Based on Instantaneous Slip Frequency Principles, by Hirotami Nakano, Shinichi Horie, Tsuyoshi Matsuo, and Kohji Iwata 95
Phase-Locked-Loop Speed Control of Motors by PID Feedback of Phase Difference, by Goro Miura and Akio Takano 104
Constant Margin Angle Control of Commutatorless Motor Using Table Look-Up Method, by Shoji Fukuda, Sinji Sakata, and Takeshi Temma 112
Optimal Robust Servo System Design and Simulation of Magnetic Levitation System in Controlled Permanent Magnet Linear Synchronous Motor Vehicle, by Kinjiro Yoshida and Hiroshi Muta 122
Design of Type 1 Optimal Digital Servo Systems Using an Optimal Series Compensator, by Kang Zhi Liu and Tsutomu Mita 130

Number 5

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Application of Conductive Polymers to Secondary Battery, by Masao Morishita, Sueki Abe, Akio Nojiri, and Kenji Shinozaki 1

Page

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Harmonics on the AC Side of HVDC System Directly Connected to Generators, by Naoto Fukuyama, Yasuji Sagisaka, and Yasuji Sekine 10
Harmonic Stability Analysis of HVDC System Directly Connected to Generators, by Naoto Fukuyama, Yasuji Sagisaka, Katsuyoshi Neri, and Yasuji Sekine 18
Step-Out of Generator under Low Frequency Oscillation in Large Power System, by Naoto Kakimoto, Yukio Ohnogi, Hisao Matsuda, and Shigeshi Kawamoto 27
Coordinated Control of PWR Nuclear Power Plant and HVDC Radial Type Transmission System, by Yasuji Sagisaka (deceased), Koji Saikawa, Kunihiro Hamaba, Tetsuro Shimomura, and Isao Iyoda 36
Hierarchical Computation Scheme for State Estimation Using Fast Second Order Method, by Masanori Kusano and Shinichi Iwamoto 47
Stabilization of Series Compensated System by Superconducting Magnet Energy Storage System, by Yasunori Mitani, Kiichiro Tsuji, and Yoshishige Murakami 58

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits, Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

Development of an Electronic Spot Detection System, by Muneaki Mizote, Hiroshi Kogo, Yasushi Ariga, and Goro Nakamura 67
Computer Vision System by Model Representation Involving Ambiguous Concepts, by Osamu Yoshie, Hiroki Miyachi, Takashi Andou, and Kageo Akizuki 74

PART D

Industrial Applications

Backward Noise Generation in a Forward DC-to-DC Converter, by Tamotsu Ninomiya, Masatoshi Nakahara, Hisanobu Tajima, and Kousuke Harada 85
Control Method for a Twist Response Type of Electromagnetically Levitated Truck and Its Experiments Using Digital Control Theory, by Toshiko Nakagawa, Sakae Yamamura, and Kunio Nakanishi 94
Equivalent Circuit of Short Rotor Linear Induction Motor Based on Magnetic Field Analysis, by Shijun Ryu, Takashi Onuki, Ryou Hirayama, and Hiroshi Sekine 102
A Study on the Relationship between Gap Geometry and Thrust Force of PM-Type Linear Pulse Motor, by Nagahiko Nagasaka and Takefumi Kabashima 111
Performance Calculation and Evaluation Method of Direct Circuit Motor with Gap Winding Armature, by Kazuo Ohnishi 120
A Finite-Element Analysis of a Three-Dimensional Eddy Current Diffusion Problem and Its Application to a Flux Concentration Apparatus, by Takeshi Yoshimoto, Satoshi Yoshida, and Kazuo Bessho 127
Design of an Active Power Filter Using Multi-Series Voltage Source PWM Converters, by Hirofumi Akagi, Yoshifumi Tsukamoto, and Akira Nabae 135

Number 6

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Electrochemical Analysis of Halo Phenomena in Crosslinked Polyethylene Insulated Cable, by Koin Kawamura, Fumitoshi Noto, John A. Tanaka, and Dwight H. Damon . . . 1

Page

Behavior of Corona Discharges in a Rod-to-Plane Gap in Atmospheric Air under AC Voltage Application, by Hiromu Isa and Muneaki Hayashi 9

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Frictional Motion of Conductors of a Pancake-Type Superconducting Magnet, by Masaichi Umeda and Yoichi Kimura 17
An Advanced Evaluation Method of Load Frequency Control Taking into Account Facility Cost, by Kimitsugu Honda 25

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits, Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

Fault Section Estimating Method Based on Knowledge and Physical Objective Model, by Chihiro Fukui and Junzo Kawakami 32
Three-Dimensional Data Acquisition System for Robots, by Tsutomu Hasegawa 42
Magnetic Field Controlled Type Current Sensor, by Toshikatsu Sonoda and Ryuzo Ueda . 50
Optimal LQ Problem for a Large-Scale Progressive System, by Shusuke Hashimoto and Naganori Umezu 60

PART D

Industrial Applications

A Method of Pipeline Diagnosis by a Mobile Robot, by Hidemi Hosokai and Toshio Fukuda 68
Construction of a Discrete Perfect Model-Following Controller, by Yuji Kamiya 76
Effect of Magnetic Induction of Electrical Steel on the Motor Losses, by Takeshi Yagisawa, Kenshi Ishihara, and Juzaburo Shibayama 84
Approximation Analysis of Three-Dimensional Magnetic Fields in Iron Cores Laminated with Grain-Oriented Silicon Steel, by Takayoshi Nakata and Yoshihiro Kawase . . . 90
Principle and Fundamental Characteristics of Half-Wave Rectified Brushless Synchronous Motor, by Jun Yamaguchi, Shunsuke Toba, Tsuyoshi Higuchi, and Eiji Yamada . . 98
Full Armature Voltage Drop Compensated and Automatic Voltage Regulated Static Leonard Control System, by Tsutomu Konishi 107
Analytical Methods of Current Output Type GTO Converter, by Ryozo Itoh and Kouichi Ishizaka 115
A High Frequency Inverter Linked DC-DC Converter Using Asymmetrical SCR, by Toshihiro Nishimura, Matsuo Nakamura, and Tohru Maruhashi 124
